

Name: Dipsana K.C.

Degree: Master of Science

Discipline: Sustainable Agriculture

Institution: Lincoln University, Missouri

Internship Project: Advancing indigenous fruits and vegetables production through climate-smart approaches in Nigeria.

Contact: kcdipsana123@gmail.com

Bio: Dipsana K.C. is a sustainable agriculture graduate student at Lincoln University, Missouri, with a Bachelor of Science in Agriculture from Tribhuvan University, Nepal. She has over three years of experience working on government-led agricultural development programs, including the Prime Minister Agriculture Modernization Project (PMAMP), the Improved Seeds for Farmers Program (KUBK), and Organic Agriculture Development. Her expertise includes integrated pest and disease management, agrobiodiversity conservation, soil health, and sustainable farming systems.

Dipsana has served as a technician in the Integrated Agriculture and Livestock Development Office and participated in international academic programs such as the Summer School GROW 2023, focused on agrobiodiversity and climate change. Passionate about applied research and farmer-centered solutions, she brings strong skills in field extension, stakeholder collaboration, and sustainability advocacy. Dipsana is committed to enhancing agricultural resilience and food security through education, research, and cross-cultural engagement.
