### AGENDA

**4 p.m. Welcome and Introduction**

**4:10 p.m. Wine BMP: Pre-bottling Techniques for Improved Wine Quality and Stability— Allen Frank Humphries**

“Before bottling, the winemaker has many options for modifying different organoleptic aspects of the wine. Depending on the desired style of wine, and market demand, sensations such as acidity, sweetness, astringency, and mouth feel can be customized by using different products and techniques.”

**4:30 p.m. Vineyard BMP: Common Mistakes in Muscadines and Southern Grapes Dormant Pruning — Violeta Tsoleva, Ph.D.**

“Pruning is the most essential dormant season vineyard management activity. Grapevines are not the only things dormant in the vineyard during winter. Fungal disease inoculum (particles capable of infection) awaits the emergence of susceptible new shoot tissues.”

**4:50 p.m. Q & A Session**

**5 p.m. Virtual Tour of Newly Renovated Wine Processing Research Facility**
